

RouterBOARD 604

The new RB604 is an expansion for RouterBOARD 600 and also the RouterBOARD 500 series. It attaches to the RB device to add 4 additional miniPCI slots, your RouterBOARD 600 can now have 8 miniPCI slots total!

The RB600 is a high performance wireless platform. It has four miniPCI slots and three gigabit ethernet ports and it is the fastest wireless board that MikroTik has made, see more on www.routerboard.com routerboard

MUM India 2008

Just announced - MikroTik will be coming to India, Mumbai in April this year with the annual MikroTik User Meeting, taking place on April 19th, in Hotel Satkar Residency (Mumbai).

This is your chance to meet MikroTik staff, listen to other users presentations and try new MikroTik products.

Also use this opportunity to present your mikrotik solutions to other visitors of the MUM and show them how you solved interesting network challenges -

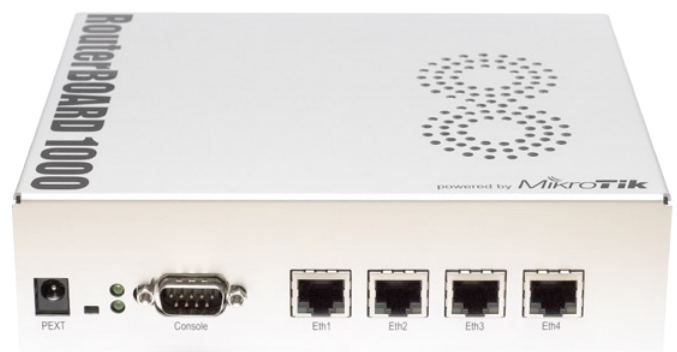

exchange information, meet new customers and be the first to know about new MikroTik products.

More information: <http://mum.mikrotik.com>

The new RouterBOARD 1000

MikroTik is proud to introduce the next generation router, the powerful RouterBOARD 1000, already shipping to distributors. It will be available in two different types of cases - the indoor compact case, and the 1U rackmountable case, both in bright aluminium color. The RouterBOARD 1000 has the most advanced CPU of all MikroTik routers, and can throughput a record number of ~3.2Gbps. See more on <http://www.routerboard.com>

The Dude news

Thanks to you all we have already 20 languages available for the Dude, which means that you can have your network monitor application in Arabic, Russian, Spanish or Bulgarian - just head over to <http://wiki.mikrotik.com> and download the translated interface file.

If your language is not available or needs to be updated to a newer Dude version - a free license is waiting for you!
